

Cruising Equipment E Meter Manual

Cruising Equipment E Meter Manual - This meter is sold under a variety of brand names: Cruising Equipment Company meters are called an E-Meter. Heart Interface units are labeled Link 10. Other companies have private brand names for this product. For convenience, this manual refers to all units as "Your Meter" since all meters support identical functions. CruisingEquipment.com was started shortly after Cruising Equipment and Heart Interface went out of business around the year 2000 to continue support for the dedicated customers of the products that are no longer being manufactured. See public information and documentations of Cruising Equipment Company and Heart Interface Company products. - - Cruising Equipment Co and S/L Manual (<https://www.sailnet.com/forums/gear-maintenance/7609-cruising-equipment-co-s-l-manual.html>) E meter Adapter Description: These sealed High Voltage Adapters allow the Link 10 series of E meters are designed to work within the 0-100V and 0-500V battery pack voltages.
