WELCOME TO IHI COMPACT EXCAVATOR SALES The U.S. Leader in Compact Construction Equipment. Whether it's supplying our Crawler Carriers to the oil & gas industry, Mini Excavators to the rental industry or Concrete Buggies to construction companies; Compact Excavator Sales has been putting high-quality, compact, construction equipment on the job for over 20 years. I have a 1996 TB045 with the Yanmar three cylinder engine. If the temperature drops below 50 degrees, it will not start. It will start with a shot of starting fluid, but the old timers around here say not to use it since the engine will eventually require it to start. We need to know the model number of your Yanmar. Most of them have a manual fuel shut off lever that you pull to kill it. Mine is located on the right side of the dash at the bottom.
